User Manual - Gnome Map Wrocław

Application Overview

Gnome Map is a mobile application designed for Erasmus students and visitors exploring the city of Wrocław. The app transforms the popular tradition of searching for the city's famous dwarf statues into a digital experience, allowing users to locate these figures throughout the urban landscape, capture photographic memories with each discovery, and maintain a personalized digital collection that tracks their progress in real time.

Core Application Features

1. Interactive Dwarf Map System
    - Complete visualization of all known locations of gnomes in the center of the city of Breslau with detailed map interfaces.
    - Zoom function that allows users to zoom in for detailed street-level views and zoom out for broader perspectives of the neighborhood.
    - Visual status indicators that clearly distinguish between photographed gnomes (marked with special check icons) and undiscovered locations.
    - Intuitive navigation tools that provide optimal routes.
    - Smart tracking system that automatically marks discovered gnomes and highlights remaining targets to complete your collection.

2. Local Progress Storage
    - Automatic saving of your collection progress directly to your device's local storage.
    - Persistent data retention that maintains your album between application sessions.
    - Efficient storage management that optimizes photo sizes while preserving image quality.

Planned improvements for the future

- Implementation of detailed real-time maps using accurate real data from Wrocław.
- Advanced GPS integration providing turn-by-turn navigation.
- Achievement system with special badges and rewards for completing specific collection milestones and challenges.
- Social media integration allowing users to export their favorite photos directly to Instagram, Facebook, and other platforms.
- Historical and cultural information database offering stories about the origin and meaning of each dwarf statue.

User Guide Instructions

- Launch the app and access the main map interface to get an overview of the available gnome locations.
- Navigate the cityscape using the map's orientation system to locate the gnome statues.
- Document your discoveries using the built-in camera to capture photographs.
- Organize your personal collection in the album section, where you can review, organize, and manage your growing gallery of souvenirs.
- Complete the collection by systematically visiting all gnome locations.
